DOCUMENTS MODULE

Backend Exists

- POST /api/documents/upload
  → expects multipart/form-data
  → field name: file
- GET /api/documents/download/:requestId

Frontend Exists

- Upload button present
- Calls /api/documents/upload
- Sends JSON only (no file)

⚠ Issue

Backend expects file, frontend never sends file → uploads fake.

Action

- Change upload to FormData
- Append:
  - file
  - requestId
  - candidateId
  - documentType
- Remove JSON-only upload

SUBMISSIONS MODULE

Backend Exists

Recruiter:

- GET /api/recruiter/submissions
  → supports: status, client, startDate, endDate, page, limit, sortBy, sortOrder
- POST /api/recruiter/submissions

- PUT /api/recruiter/submissions/:id

Admin:

- GET /api/admin/submissions
  → supports: startDate, endDate, recruiterId, technology, mode

Dynamic fields stored in:

submission.customFields

Keys are case-sensitive.

Frontend Exists

- Some hardcoded fields (Rate/Technology)
- Case mismatch (Rate vs rate)
- Filters incomplete
- Sorting inconsistent
- Date timezone inconsistent

⚠️ **Issues**

- Custom fields disappear after refresh
- Admin sees blank values
- Date shifts if user is outside US
- No recruiter filter on admin page
- Sorting by date unreliable

🔧 **Action**

A) Custom Fields

- Remove hardcoded fields
- Load builder config for submissions

- Render dynamic fields
- Save only in customFields[key]
- Normalize legacy casing (Rate → rate)

B) Add Filters

Add UI filters:

- Recruiter (Admin only)
- Date range
- Status
- Client
- Search (Enter triggers backend fetch)

C) Sorting

- Default: sortBy=submissionDate
- Support asc/desc
- Call backend with sortBy and sortOrder

D) Date Consistency

- Display in America/Chihuahua timezone
- Use submissionDateUS if exists

REVENUE LEDGER

Backend Exists

- GET /api/reports/revenue-ledger?from=YYYY-MM&to=YYYY-MM

Frontend Exists

- Shows totals
- May compute some values separately
- Sometimes visible to non-admin

⚠ Issues

- Totals mismatch
- Wrong client names
- Slow load
- 403 for non-admin

Action (Jacob)

- Use one backend response for summary + table
- Hide page for non-admin
- Default to last 3 months
- Never compute totals locally

INVOICES (CRITICAL)

Backend Exists

- POST /api/admin/invoices/preview
- POST /api/admin/invoices
- POST /api/admin/invoices/:invoiceId/send
- GET /api/admin/invoices
- GET /api/admin/invoices/:invoiceId/pdf

Frontend Exists

- Invoice create screen
- Send button
- Timesheet selector
- Search
- Attachments display

Issues

- Wrong timesheets appear
- Total mismatch

- Send button not wired
- Search filters locally only
- Invalid Date shown
- Attachments fake

Action

1. Timesheets must come only from backend preview.
2. Show backend preview totals.
3. Wire Send button → /send
4. Refetch list on search.
5. Replace Invalid Date with —
6. Show real attachments.
7. Fix status color logic.

BILLING PROFILES

Backend Exists

- GET /api/admin/billing-profiles
- PUT /api/admin/billing-profiles/:clientName

Frontend Exists

- Status always Active
- Edit button sometimes does nothing

Issue

Frontend not reflecting backend response.

Action (Jacob)

- Use backend status field
- Wire edit → call PUT
- Refresh list after update

SALARY + PTO

Backend Exists

- GET /api/salary/snapshots
- Recruiter PTO endpoints

Frontend Exists

- Salary screen
- PTO screen

⚠️ Issues

- PTO shown across all time, not per month
- Confusion between snapshot month and PTO count

🔧 Action

- Filter PTO to snapshot month
- Display:
  - excessPtoDays
  - salaryDeduction
  - finalPay
- Never recompute salary client-side

PTO ADMIN

Backend Exists

- Standard PTO fields: from, to, days, status

Frontend Exists

- Uses fallback mappings
- Dummy PTO page exists

Issue

Wrong dates displayed.

Action (Jacob)

- Use canonical backend fields only
- Remove dummy PTO page

CHAT MODULE

Backend Exists

- POST /api/chat/send
- GET /api/chat/inbox
- GET /api/chat/unread-count
- GET /api/chat/conversations/:userId
- GET /api/chat/users
- GET /api/chat/search?q=

Frontend Exists

- Basic chat works
- No polling
- No attachment logic
- No role restriction UI

Issues

- Messages don’t auto-refresh
- Attachments misleading
- Unread count may not reset properly

Action

- Add polling (5–10 sec)
- Add mark-as-read logic if available
- Enforce role restrictions in UI

- fully implement

CANDIDATE CREATION

Backend Exists

- Recruiter can create → auto assigned
- Admin/Lead can create → assign recruiter

Frontend Exists

- Admin create screen may not show recruiter dropdown

Issue

Candidate created by admin may not be assigned.

Action

- Add recruiter dropdown in admin create form
- Pass assignedRecruiter in request

🔟 GLOBAL UI ISSUES

Issues

- Mobile layout weak
- Sidebar collapse glitch
- Search Enter not wired
- Fake notifications
- Permissions free-text
- Wrong routing buttons

Action

- Fix responsive layout
- Fix sidebar toggle
- Enter triggers backend fetch

- Remove demo data
- Convert permissions to dropdown
- Fix routing paths
