Project – Aadhaar Card Print Portal

1.

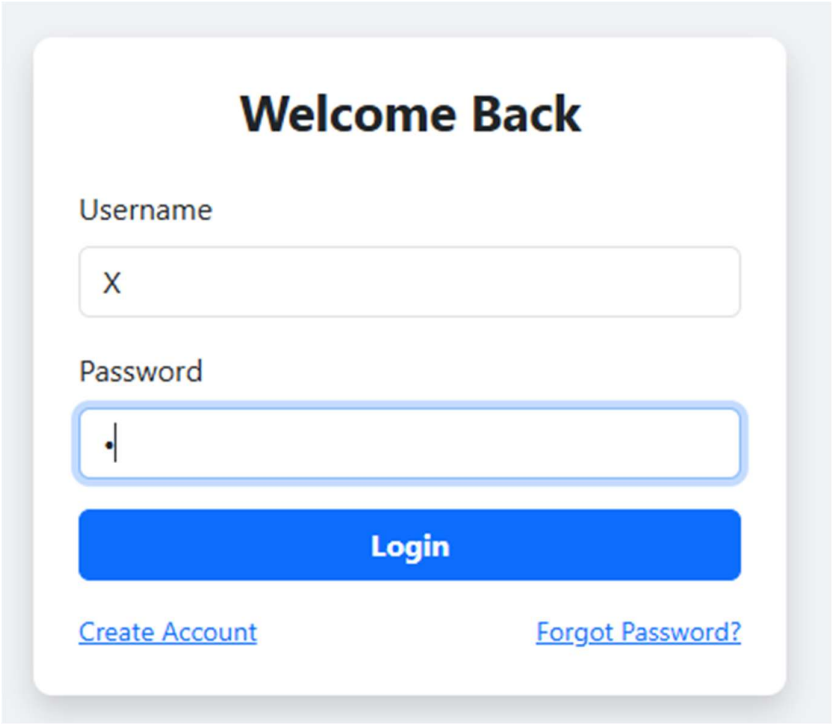
For better understanding and complete clarity, I am sharing the live reference website of the Print Portal that defines the project's overall direction and functionality:

https://xprintportal.in

This website represents the intended structure, workflow, and operational model of the project. It clearly reflects the purpose, user journey, and functional expectations of the Aadhaar Card Print Portal.

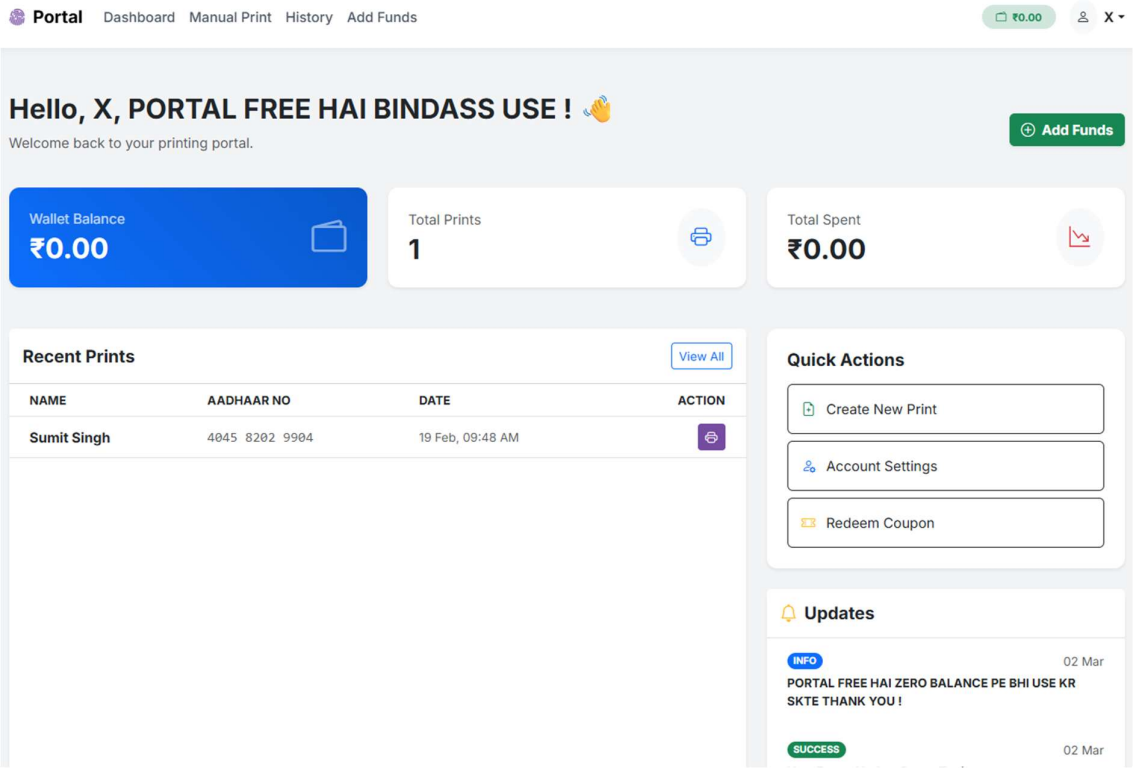
Please review it carefully to fully understand the project scope, objectives, and final implementation vision before proceeding further.

2.



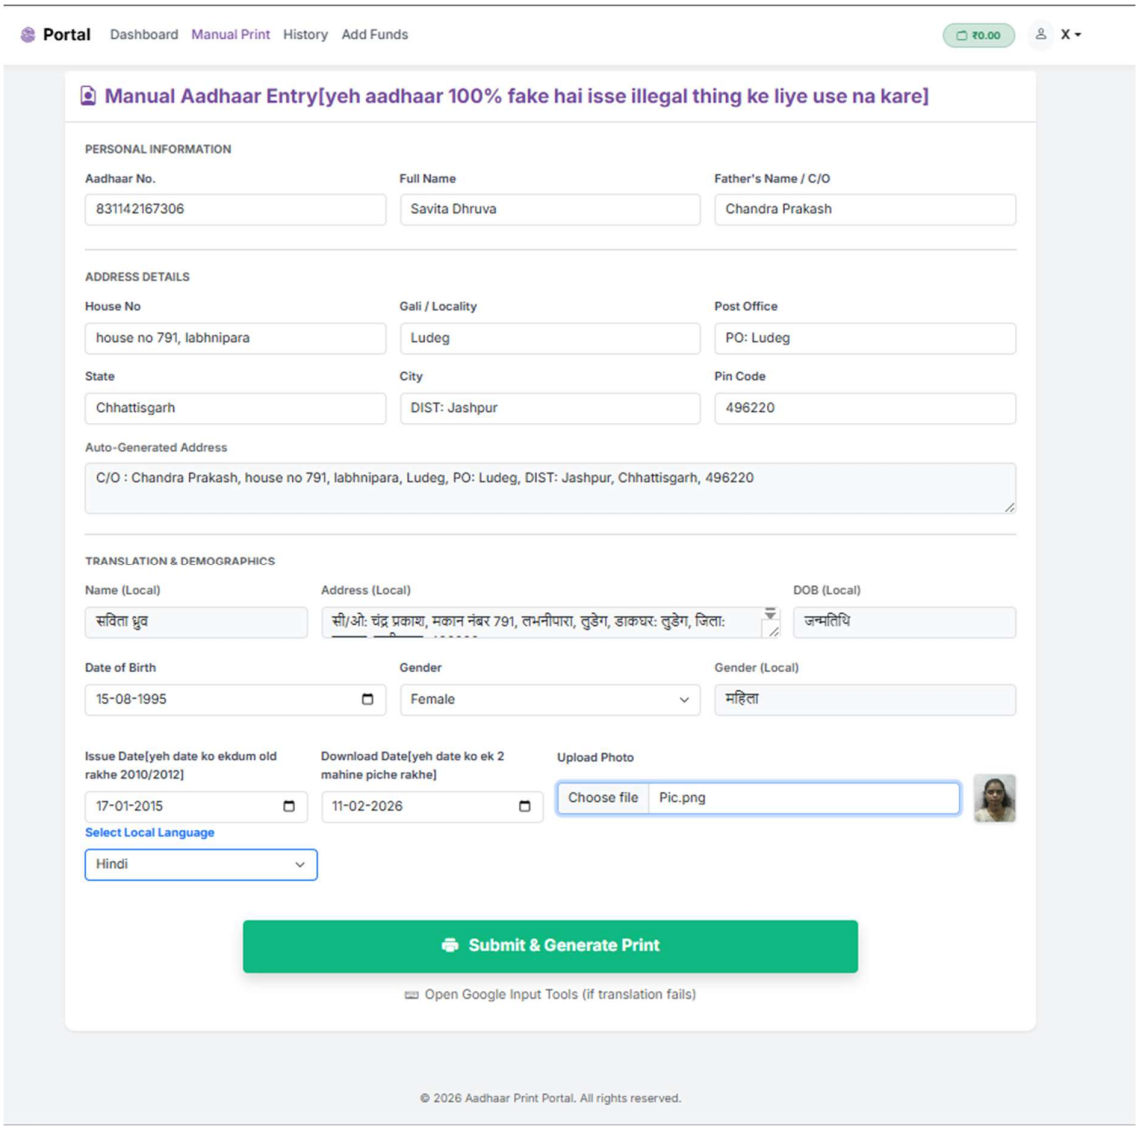
Use **capital X** for both the username and the password.

3.



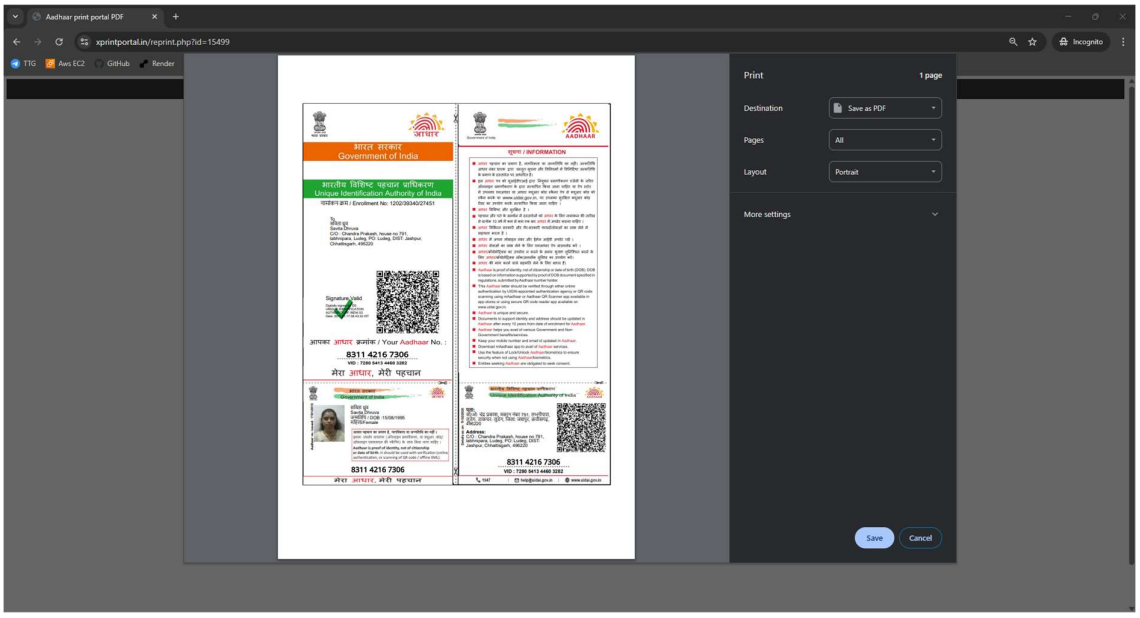
Click on **“Create New Print”** to open the form for generating the Aadhaar card.

4.



The user will enter the details exactly as per the original Aadhaar card information, then click on **“Submit & Generate Print”** to proceed.

5.



Here, you can see that the Aadhaar has been generated successfully and is ready for printout.
